WHAT IS CONNEX?

CONNEX is a state of the art scalable IoT solution, designed and developed to collect, monitor and analyze real-time data.

Using connected IoT sensors and devices, we design and implement a scalable solution to simplify your complex environment. Data is captured securely and seamlessly integrated with IBM Maximo and other Enterprise Asset Management systems. The CONNEX high performance service platform delivers the full capabilities of complete situational awareness on connected devices across your asset portfolio.

JFC is an innovator and world leader in integrating Enterprise Asset Management Systems, IoT and Artificial Intelligence. We understand your business and can offer industry specific solutions to accelerate your business drivers providing increased transparency, asset insights, and reliability.

HIGHLIGHTS

Automated actionable insights and capabilities: alerts & commands, service requests, repair processes, updates, workforce management

Automatically create work orders

Real-time condition monitoring of critical assets

Remote facility & property monitoring

DELIVERABLES

Advanced analytics

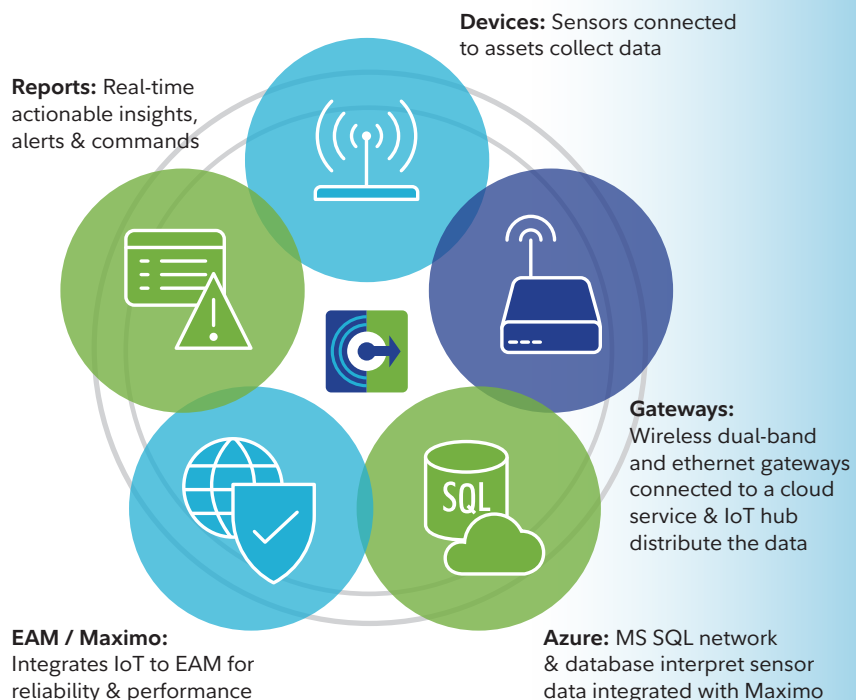

Data collection & storage

Industrial automation

Predictive maintenance

Real-time notification & reporting
